

AI browser extension to support playwright & Typescript:

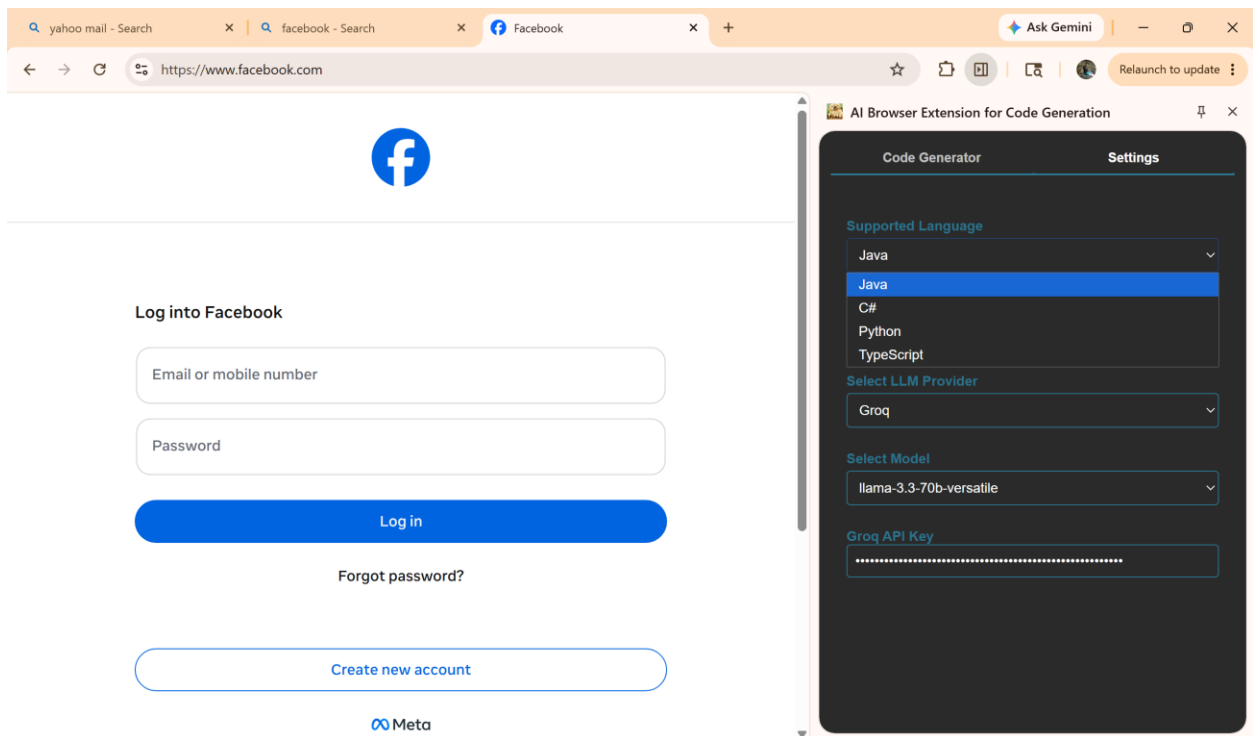

Facebook login:

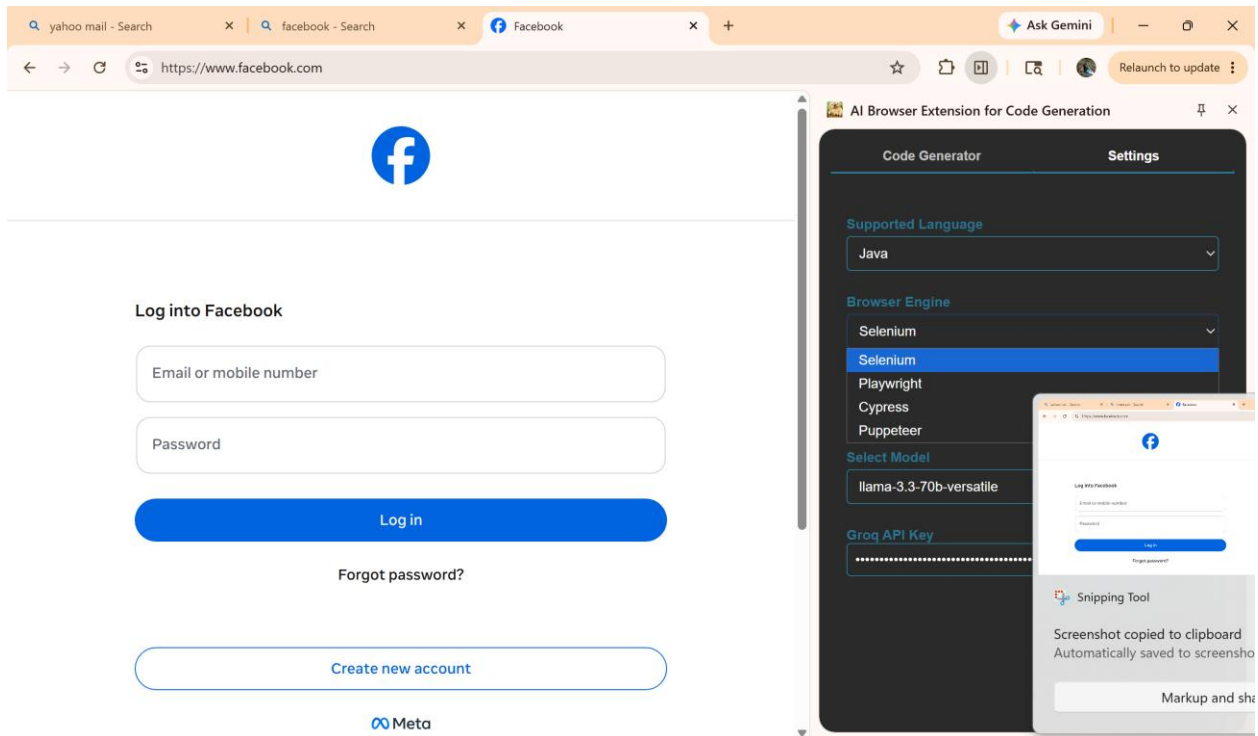

Opening Extension:

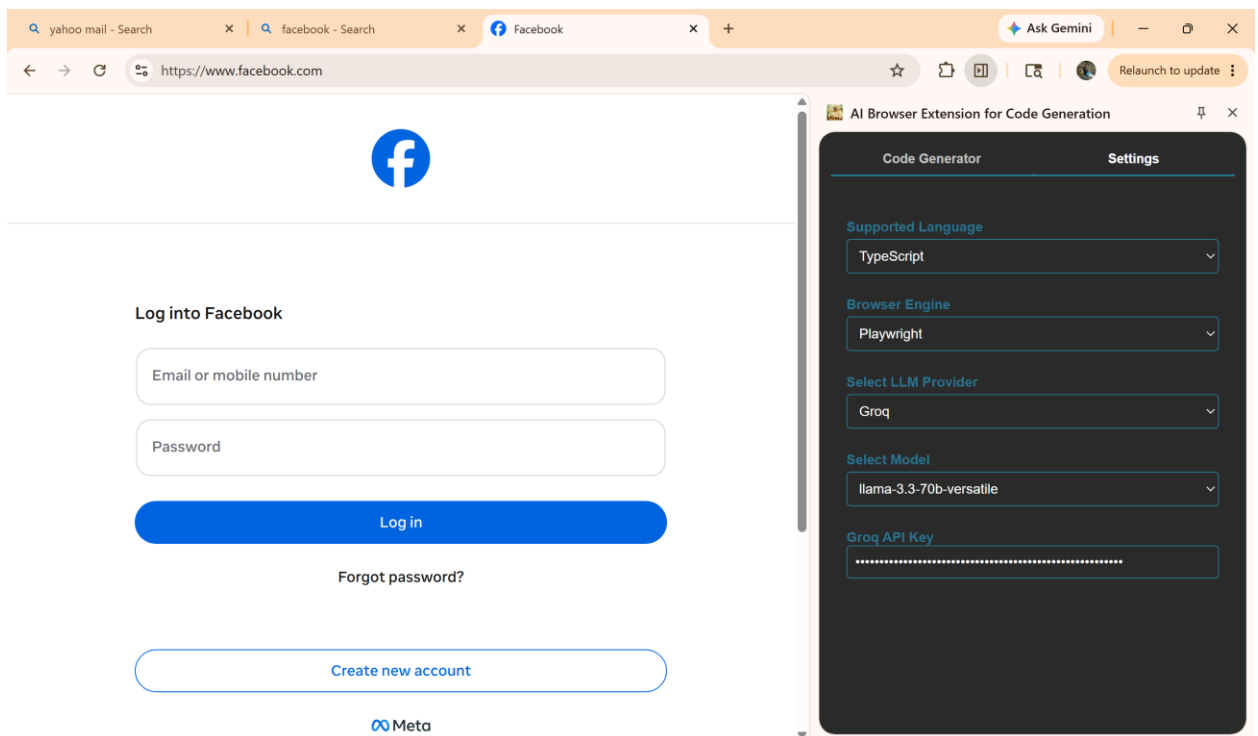

Settings:

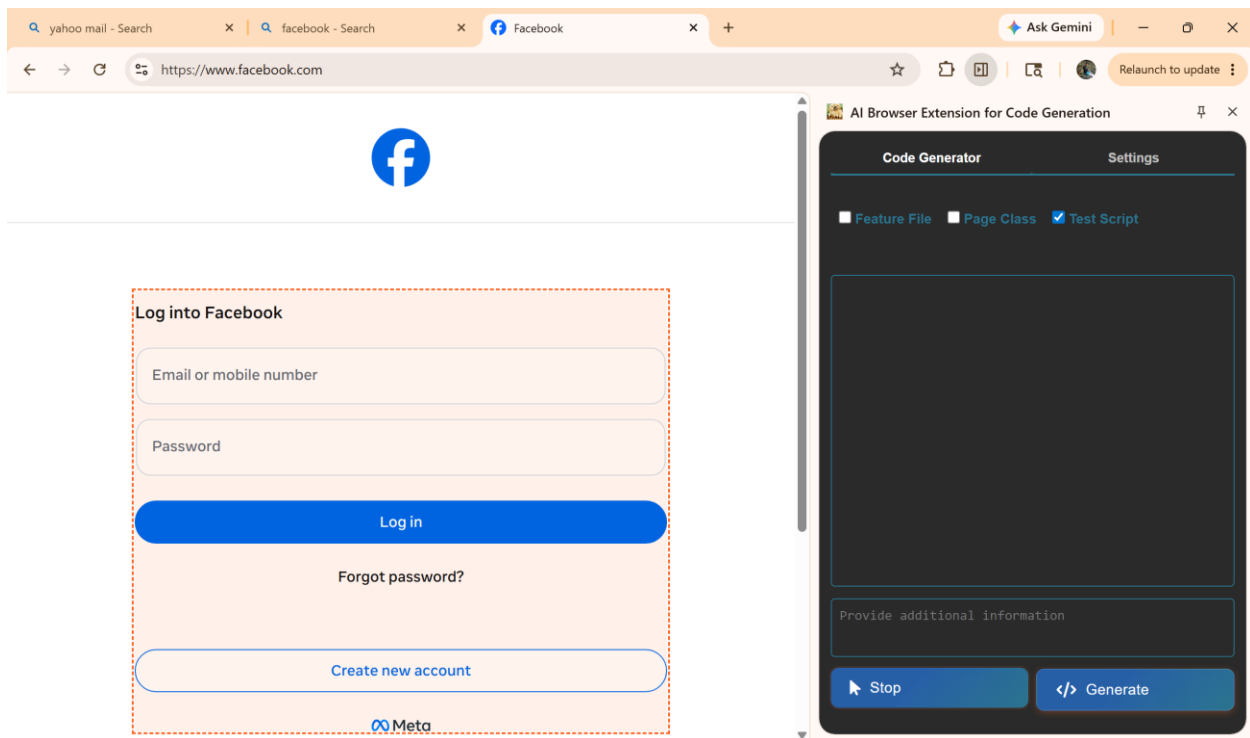

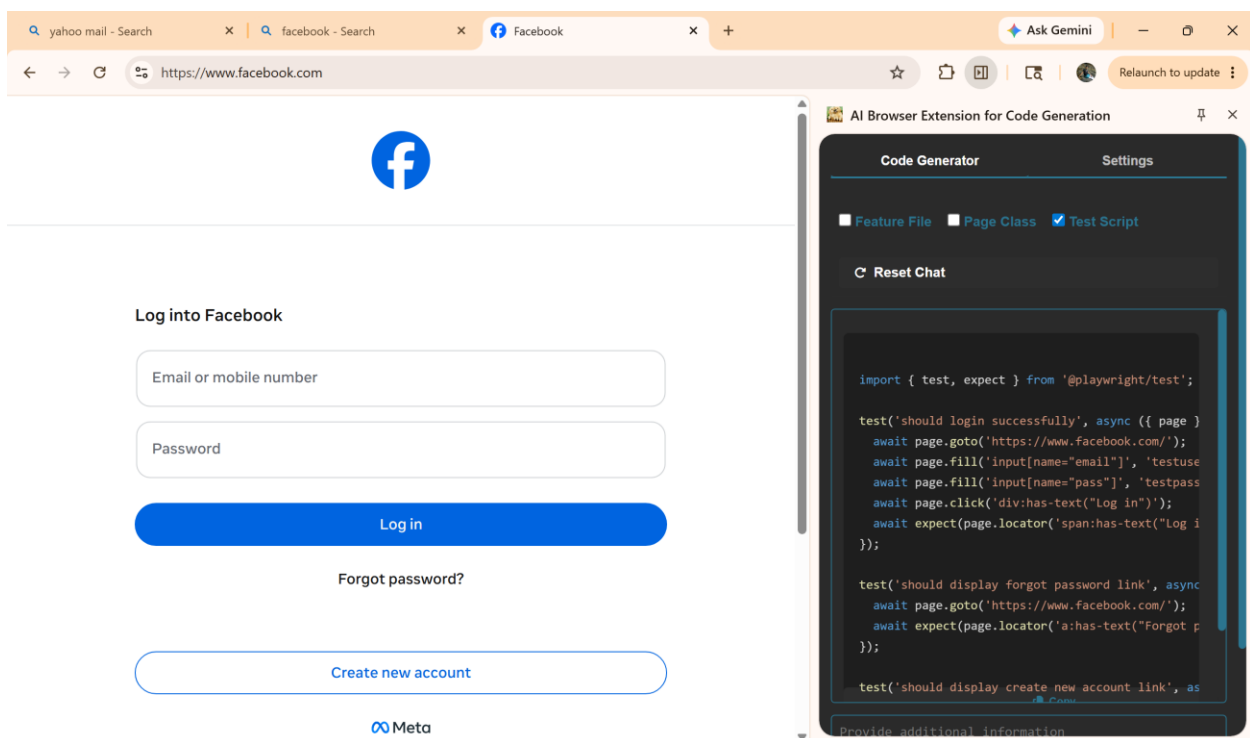

Now generating TestScripts in Playwright

Inspecting Login page

Generating Test scripts

Result:

```
import { test, expect } from '@playwright/test';
```

```
test('should login successfully', async ({ page }) => {  
  await page.goto('https://www.facebook.com/');  
  await page.fill('input[name="email"]', 'testuser');  
  await page.fill('input[name="pass"]', 'testpass');  
  await page.click('div:has-text("Log in")');  
  await expect(page.locator('span:has-text("Log in")')).not.toBeVisible();  
});
```

```
test('should display forgot password link', async ({ page }) => {  
  await page.goto('https://www.facebook.com/');  
  await expect(page.locator('a:has-text("Forgot password?")')).toBeVisible();  
});
```

```
test('should display create new account link', async ({ page }) => {  
  await page.goto('https://www.facebook.com/');  
  await expect(page.locator('a:has-text("Create new account")')).toBeVisible();  
});
```

```
test('should have a visible login form', async ({ page }) => {  
  await page.goto('https://www.facebook.com/');  
  await expect(page.locator('form[id="login_form"]')).toBeVisible();  
});
```
