

User story to Test case generator:

The screenshot shows a web browser window with the address bar displaying 'http://localhost:5174'. The page title is 'User Story to Tests'. In the top right corner, there is a 'Connect JIRA' button and a 'Relaunch to update' button. The main heading is 'User Story to Tests' with the subtitle 'Generate comprehensive test cases from your user stories'. Below this, there is a form with four sections: 'Story Title *' with a text input field containing 'Enter the user story title...'; 'Description' with a text area containing 'Additional description (optional)...'; 'Acceptance Criteria *' with a text input field containing 'Enter the acceptance criteria...'; and 'Additional Info' with a text area containing 'Any additional information (optional)...'. A vertical scrollbar is visible on the right side of the page.

This screenshot shows the same web application interface as the previous one, but with a 'Connect to JIRA' modal dialog box open in the center. The dialog has a title 'Connect to JIRA' and three input fields: 'Base URL' with the value 'https://suganraags.atlassian.net', 'Email Address' with the value 'suganraags@gmail.com', and 'API Token' which is currently empty. At the bottom of the dialog are 'Cancel' and 'Connect' buttons. The background form is dimmed, and the 'Generate Test cases' and 'Generate Feature file' buttons are visible at the bottom of the form area.
