Outputs

Logs

****Improvement Areas****

1. ****Add explicit acceptance criteria for JSON data parsing and issue extraction****:

Specify expected output formats for ID, Summary, and Description.

Define error handling for invalid or missing data.

2. ****Specify validation rules for JSON data structure****:

Verify that the JSON data conforms to expected schema.

Identify potential issues with nested objects and arrays.

3. ****Include system actor details for JSON data processing****:

Define roles and responsibilities for data processing and extraction.

Specify security measures for handling sensitive data.

****Review Summary****

The user story is clear and concise, but lacks detailed acceptance criteria and preconditions. The story reflects strong healthcare relevance and compliance focus, making it a valuable addition to the project. However, there are areas for improvement to ensure well-structured, testable, and compliant user stories.

****Recommendations****
